

The innovative
alternative to
netwrap

Agribale 16µm

Agribale replaces netwrap on round bale silage and adds extra layers of protection to wrapped bales. The film has a high holding force, which maintains high bale density. This reduces oxygen ingress and silage spoilage.

Agribale 13µm

Agribale 13µm is a stronger baler film designed for use with compactor machinery. The higher thickness of the film can allow for less layers and more bales with the correct machinery settings.

® Agribale

The Agribale range is manufactured using innovative pre-orientated technology, which creates a high holding force. The reels are packaged in a PE sleeve, which can be recycled with the baler films.

For optimum results, we recommend combining Agribale with PolybalePro. This Film&Film system creates reduced silage spoilage, easy bale opening and easier recycling.

Tighter,
denser bales

Complete film
coverage

Easy to open
and recycle

Specification			
Width (mm)	1280	1280	1380
Thickness (µm)	13	16	16
Length (m)	2400	2000	2000
Pallet Dimensions (cm)	112 x 130	112 x 130	112 x 147
Reels/Pallet	20	20	20
Pallet Height (cm)	± 110	± 110	± 110

Agribale 13µm & 16µm are not UV stabilized and should always be used in combination with Polybale stretch film.
